HCL DevOps

HCL DevOps + SAP

Better Architected.

Better Designed.

HCL DevOps

Introduction

HCL DevOps allows you to compose with your existing environment by offering solutions to key challenges with SAP. With products to facilitate the automation, visibility, governance and control for your development teams, you can rely on better quality software – faster.

HCL DevOps + SAP

	Features 3rd party tools integrations capability in hybrid SAP & Non-SAP environments		Provides value stream management and insights into enterprise DevOps practices
	Supports multi-cloud based application deployment and release orchestration		Offers blue-green deployment strategy with Near Zero Down Time (NZDT)
	Integrates with any CI/CD tools		

An investment with HCL Software DevOps doesn't mean you have to replace the tools and platforms your team knows and loves – instead, we help you maximize and leverage the tools you already have, like SAP, Jira, Jenkins, Git and Kubernetes.

Featured Products

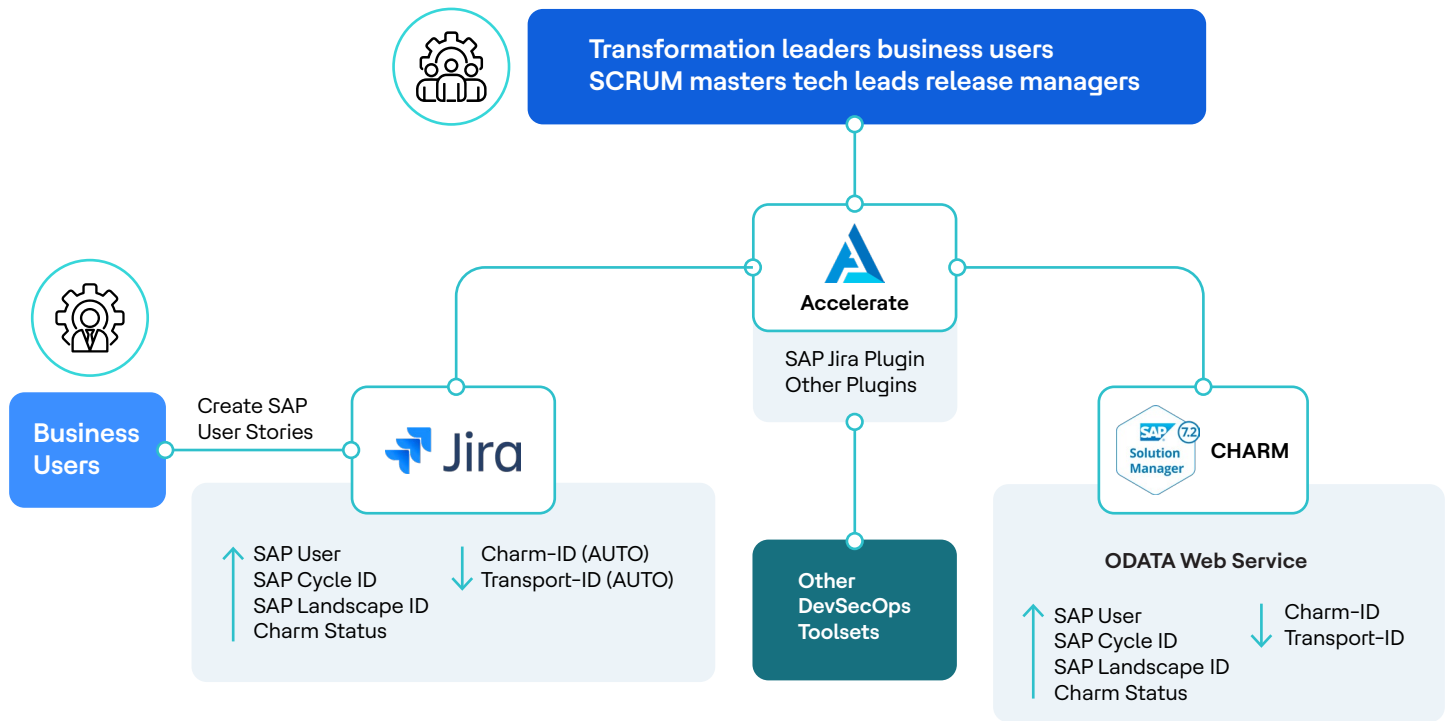

HCL OneTest + SAP

HCL OneTest suite features a script-less, wizard-driven, test authoring environment, and supports more than 100 technologies and protocols to provide successful manual and automatic tests execution with SAP

				
Functional testing Provides UI test automation for SAP GUI and SAP Web (Hana, Fiori, OpenUI5)	Performance testing Provides performance testing for SAP GUI and SAP Web (Hana, Fiori, OpenUI5)	API testing Trigger and validate SAP APIs (BAPI, RFC, IDOC) across a range of SAP environments – ECC, PI, Hana	Test data Generate new, synthetic data sets for your SAP testing environments	Service Virtualization Virtualize missing components of the SAP landscape to enable faster development and testing.
