

HCL Link

Connect. Transform. Activate!

Overview

HCL Link is all about Connecting different business units, processes, applications and data to enable Digital Transformation and enable you to Activate your Business!

HCL Link is a modernized tool to help enterprises solve multifaceted data integration problems. As a code-free solution, it provides the ability to connect to the source or target application of the relevant data and then processes complex data transformation and validation across a range of messaging standards and data formats, including those involving industry-specific formats.

HCL Link is essential for companies where business requirements are always changing. A comprehensive and easy-to-use data transformation and integration solution accelerates IT projects that support business and compliance initiatives. HCL Link can fit across the organization and into the cloud to help with many different integration challenges.

Key Business Benefits

High Performance

Event-driven, transactional environments to ensure completion and validation of transactions in real time or batch.

Standards Support

Out-of-the-box solutions for industry standards and regulatory compliance for operational and transactional data integration.

Lower costs

Accelerate projects and reduce implementation costs to retire old or manual processes or interfaces that are inflexible and expensive to maintain.

Reduce development & maintenance effort

Save time on the maintenance of implementations by taking advantage of accessing meta-data or using pre-built standards.

Flexibility

Prepare for changing business, compliance, and application environments with the most adaptable data transformation and integration platform.

Key Features

Single unified platform

Eliminates the need for multiple data transformation and integration tools – run on multiple platforms using the same maps.

Highly scalable

Handles 10's of thousands of transactions per second to keep up with the speed of business.

Industry-standard toolkits

Out-of-the-box solutions for industry standards and regulatory compliance for operational and transactional data integration for Healthcare, Financial Payments and Supply Chain ED.

Best-in-market transformation

Transform data from any format to any format including hierarchical, semi-structured and mixed data - read in data from multiple sources and write to many destinations in one pass.

Flexible deployment options

Deploy in the cloud, on-prem or in hybrid environments with multiple invocation methods: on demand, via API, scheduled or event driven.

Code-free development

Modeling, development, and testing of transformations and integration solutions via an easy-to-use code-free approach.

About HCL Software

HCL Software is a division of HCL Technologies (HCL) that operates its primary software business.
